

Starting point is: $(-b) * (-c + b)$

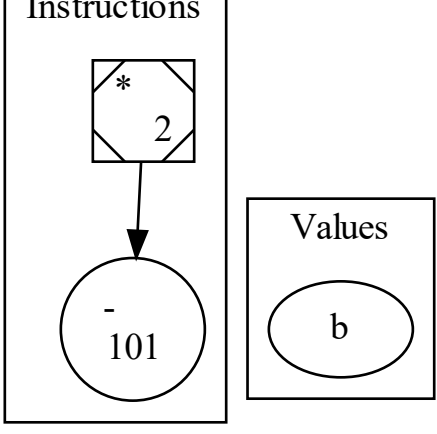

We push the operator: $-$

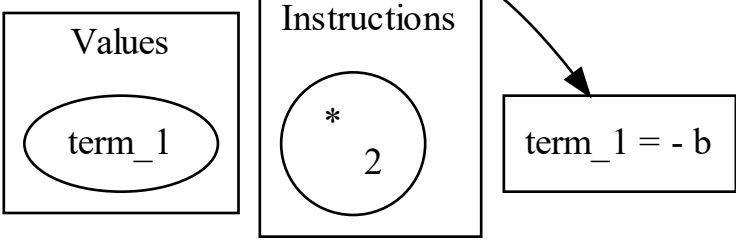

We push variable: b

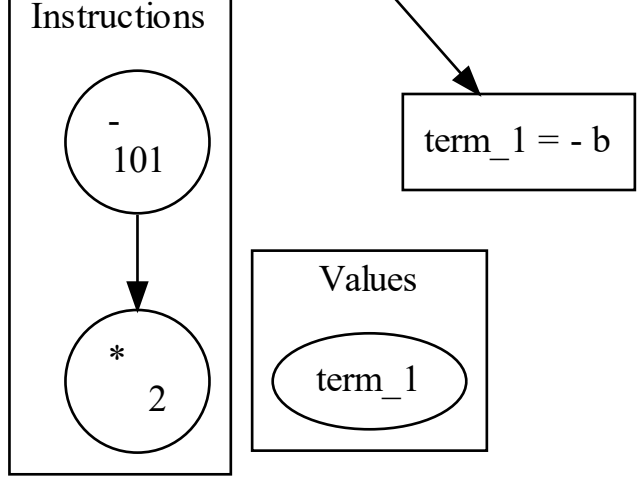

We push the operator: $*$

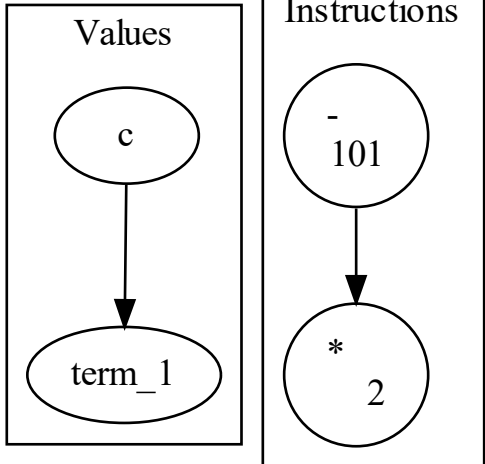

We can't push the last operator, so we pop, and create a term

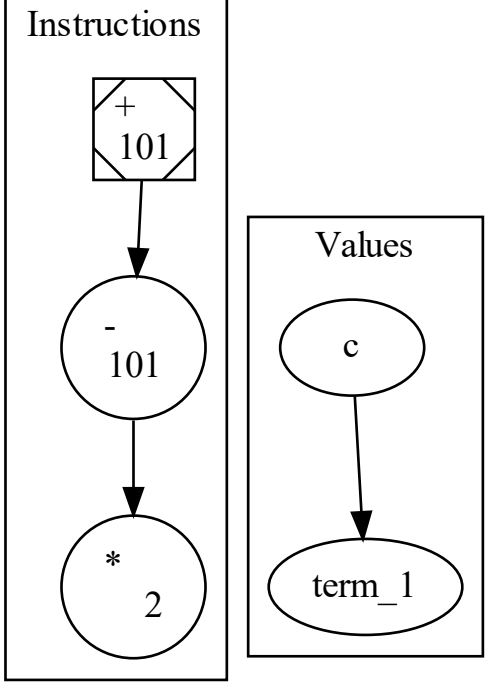

We can't push the last operator, so we pop, and create a term

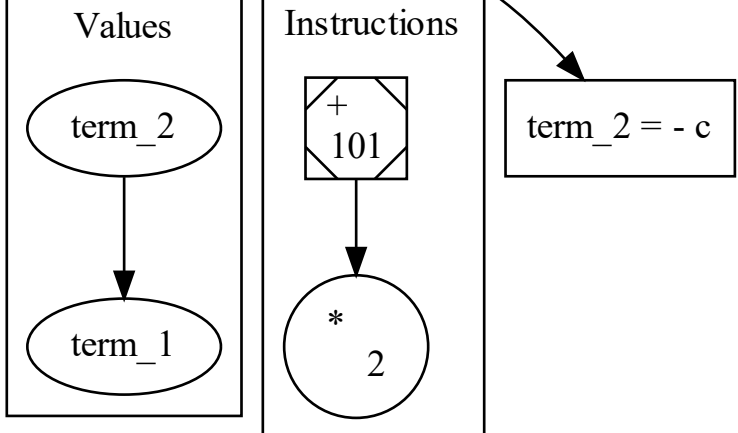

We push variable: c

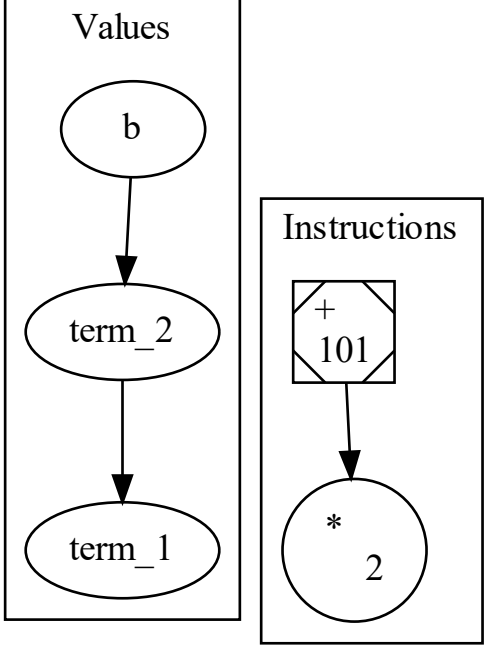

We push the operator: $+$

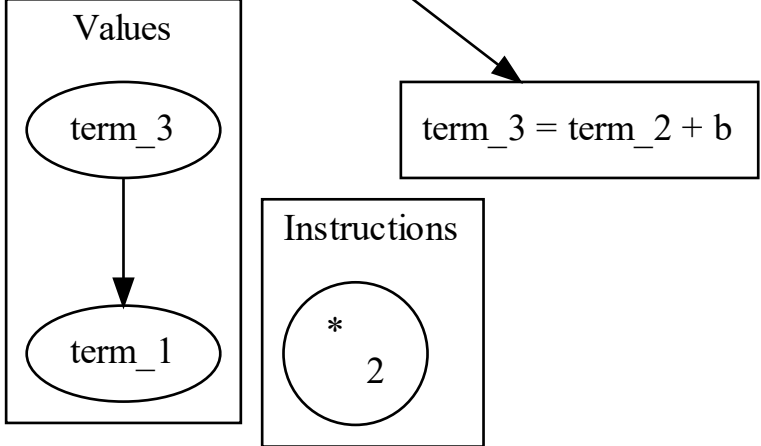

We can't push the last operator, so we pop, and create a term

We push variable: b

No more operators to push, so we pop, and create a term

No more operators to push, so we pop, and create a term
